

T1

Electric Aircraft Tug

Are you struggling to maneuver your aircraft in a tight hangar or seeking a more ergonomic solution? The AeroTow T1 electric aircraft tug offers easier transport for a wide range of aircraft.

The AeroTow T1 is a versatile battery operated small aircraft tug that can be configured to move a variety of single engine aircraft. Our AeroTow T1 tug is often used with Cessna 182, Cirrus SR22, Piper Archer, Piper Cherokee, Van's RV, Beechcraft Bonanza, tail draggers and more. The handle, batteries, and fork are all removable, allowing the T1 to be loaded into a plane.
